# E.ON Climate & Renewables – the perfect partner for your PPA

With PPAs, companies benefit from steady, predictable costs, improve their carbon footprint and promote their green image.

We, EC&R, are among the largest renewable energy players in our core markets (Europe and US). We are one of the global leaders in developing, constructing, operating and owning utility-scale renewable projects.

We understand our partners' needs and offer specifically designed and tailored products.

Corporate PPAs can be complex, applying the learnings from our experience in North America allows us to make this partnership simple and straightforward.

# Why PPA?

## Your advantages at a glance

### **Long-Term Planning**

Avoid long term commodity price risk & yield savings

### **Sustainability**

Achieve carbon reduction goals cost effectively

### **Cost reduction**

Improve energy efficiency and waste management

### **Efficient use of resources**

Cut costs and use fewer resources

### **Public recognition**

Promote image & fulfill employee and customer commitment

# Types of PPA

A Corporate Power Purchase Agreement (PPA) is a long-term contract under which a business agrees to purchase electricity directly from a renewable energy generator.

Power Purchase Agreements provide financial certainty to you and the project developer, which removes a significant roadblock to building new renewable facilities. PPAs are therefore helping to deliver more renewable energy and saving CO<sub>2</sub>.

**Your company can make the difference and shape the renewable future.**

Contact us and we will offer you the best, tailored solution for your company – for a sustainable long-term partnership!

**The winds have  
changed their direction  
and we, EC&R,  
have adjusted our sails!**
